Gary,

It was a delight seeing you again. And I was pleased to be able to pass along the information to the University of Utah student body about the research into strip-mining being done in their name; it made the front page of their campus newspaper.

I'm deeply interested in your friend who has retired from the Rand Corporation. If he needs help in finding a publisher for his book I can be of assistance. If he wants me to publish any portion of it in The Realist I would be honored to do so. In any event I would like to interview him, either on or off the record; in either case his anonymity would be guaranteed. So please let me know his name
